

a. Co-Curricular Activities

Co-curricular activities complement academic learning by enhancing students' technical knowledge, problem-solving abilities, and teamwork skills. The institution supports various clubs and committees to facilitate professional development.

Institute-Level Professional Body membership for Co-Curricular Activities:

1. ISTE (Indian Society for Technical Education) – Organizes technical workshops, seminars, and conferences to enhance engineering education.
2. IETE (Institution of Electronics and Telecommunication Engineers) – Conducts events and research activities in electronics, telecommunications, and IT.
3. IEI (Institution of Engineers India) – Provides career guidance, technical symposiums, and skill development programs for engineering students.
4. IEEE (Institute of Electrical and Electronics Engineers) – Promotes technological innovation through research, competitions, and industry collaborations.
5. ICT Academy (Information and Communication Technology Academy) – Bridges the industry-academia skill gap with IT training and faculty development initiatives.

These activities empower students with industry-relevant skills, preparing them for future career opportunities

The details of some of the events organized under the student's chapter/student forum by the various professional bodies such as IEEE, IETE, ISTE and ICT in the academic year 2023-2024:
