

→ FEED BACK :-

During, my M.Sc course at Sharnabasva University, I had a great experience for the academic year 2022-23.

Infrastructure :- for teaching students there were well equipped classrooms with board, projectors and seating.

Faculty :- Students were encouraged by the faculty, and they were very supportive, and they used many multimedia resources to make understand. Students very well.

The labs were provided with all facilities. Manual was well-organized. Hand on activities like dissections and microscope work really enhanced understanding.

I had a great experience while I was studying, because all the faculty were very supportive and helpful and I'm very thankful that they have provided a knowledge about each subject.

Overall, I would recommend this college to others.
