

Feedback

During my MSc course at Shaantbasava University, I had a great academic experience for the year 2022-2023.

Good infrastructure : laboratories, library and classes were appreciated.

Supportive faculty : Students praise the teaching methods and faculty support.

Personally, when I am studying, all the teachers were very supportive and the environment was also very good.

A proper lab were constructed with all facilities and we are very much thankful for providing the rats for our experiment. Such a great experience which we cannot find anywhere else.

The college research opportunities resources were excellent. Overall, I would recommend this college to others.
