

Vishakha S. Navale.

As a Proud alumni of Masters in Zoology, Batch of 2021-2023, I Share my heartfelt appreciation and feedback regarding my time at Sharnbasva University.

My Journey at the University was truly enriching in both academically and personally. The Faculty members were not only knowledgeable and dedicated but also approachable and supportive. Under their guidance I learnt many things such as handling the research animals, working on them professionally, ethics of research, also learnt many trending applied courses like Karyotyping, which plays very important role in the shaping my professional path and critical thinking abilities.

I am also grateful for the infrastructure and resources provided - from well-equipped libraries and laboratories to the extracurricular activities like exploring many different geographical locations to understand the different ecosystem and study as the study tour and also encourage to the versatile internships programmes to the students.

Overall, I am deeply thankful to Sharnbasva University Department of Zoology for being foundation in my academics and personal development.

Warm regards

Vishakha S. Navale
