Description of Activity	Students of 6th Sem along with the faculties had an on 16th April 2024 at 10.00AM . Forensic science has assumed a crucial role, while detectives and law enforcement agencies are involved in the collection of evidence, be it physical or digital, it is forensic science that deals with the analysis of those evidence in order to establish facts admissible in the court of law. Students were exposed with the PPT's Presentation given by Managing Director who gave an detailed view about how the process of investigation starts – ends how the security is upheld between the handover from the court to the forensic center collecting the evidence and submitting infront of the court. In the forensic laboratory there are 4 sections related to the computer filed namely Computer Section, Mobile Section, Audio & Video Section, and Hardware Section. Once the process is complete the hash value which is termed to be as unique is generated using the message digest-5 which is of 32 bit in size and alphanumeric along with the special characters by this the integrity and security is maintained to the raw data. Prior the investigation begins the raw data from the date of purchase of device without modifying anything to the original data is copied to the external device called as write blocker on which the investigation is done. Report generated by forensic scientists are widely acceptable because of the scientific methods and authorization by the state government. In the computer section even from the broken device and from the burnt devices data's can be retrieved so that the offender is punished. In the Audio/Video section based on the speech reorganization such as the pronunciation of vowels the speech is analysis is done at the interrogation level. The coverage from the CCTV surveillance is recognized where the video is converted to frames to identify the suspect. In the Mobile Section the behavior of the lawbreaker is been identified as its been daily used and what kind of activities held by them. In conclusion the students were expressed that this program was highly informative which gives knowledge about the Dark Web Browser, Blockchain technology, Cyber Security to their curricular perspective. Visit finished by 1.00PM after taking the opinion and feedback from students.
