Description of Activity	Visiting the Govt. Higher Primary School ITAGA (A) Kalaburagi (North), mainly focused on local school's students facing problems. Climate change is a change in the world's weather system that occurs over decades. Most of the recent changes in our climate have been brought about by human activity. These changes will have significant consequences for our health, wellbeing and safety. Effects of climate change include increasing air and sea temperatures, changes in rainfall patterns, more frequent and increasingly severe extreme weather events and sea level rise. Climate change may affect our health and wellbeing through the impacts of extreme events, worsening air quality, changes in the spread of infectious diseases, threats to food and water quality and quantity and effects on our mental health. In conclusion, this programme to improving the ability of health systems to respond to climate change and its health
